

EDUCATION

Georgia Institute of Technology

Atlanta, GA

B.S. in Computer Science, GPA: 3.4/4.0

Aug 2022 – May 2026

- **Concentrations:** Artificial Intelligence & Cybersecurity
- **Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Objects & Software Design, Database Systems, Systems & Networks, Design of Algorithms, Computer Organization, Statistics, Applied Combinatorics

Georgia Institute of Technology

Atlanta, GA

M.S. in Computer Science, GPA: 4.0/4.0

Jan 2026 – May 2028

- **Concentration:** Artificial Intelligence
- **Coursework:** Knowledge-Based AI, Machine Learning, Computer Vision, Natural Language Processing, Game AI

WORK EXPERIENCE

Sonic Automotive

Charlotte, NC

Software Engineer Intern

May 2025 – July 2025

- Developed and maintained automated testing infrastructure for customer-facing automotive e-commerce applications using **.NET**, **Robot Framework**, and **Selenium**.
- Increased Mac and iOS automated test success rates from **10% to 90%** by redesigning flaky UI test suites, improving synchronization handling, and debugging cross-platform deployment issues.
- Collaborated with **10+ engineers** in an **Agile/Scrum environment** to troubleshoot production issues, validate feature functionality, and support sprint-based software delivery workflows.

Tata Consultancy Services

Cincinnati, OH

Software Engineer

June 2026 – Present

- Developed and customized **ServiceNow** applications, workflows, and catalog items to support enterprise IT service management processes for client-facing projects.
- Developed client-specific platform customizations using **JavaScript**, **REST APIs**, **Flow Designer**, and ServiceNow scripting frameworks.
- Collaborated with cross-functional teams, business analysts, and stakeholders in **Agile** sprints to gather requirements, troubleshoot issues, and deliver platform enhancements.

PROJECTS

• OfficialSports App - Junior Design Project:

- Developed a cross-platform mobile application using **React Native**, **Node.js**, **Express**, and **MongoDB** that enabled users to discover sports venues, create profiles, and communicate through real-time messaging.
- Designed and implemented **RESTful backend APIs** for user authentication, venue data management, and messaging services, supporting scalable application behavior for **5,000+ projected users**.
- Integrated **real-time communication** functionality using **WebSockets** to support low-latency user messaging and live application updates.

• Gaming Discovery & Recommendation Engine:

- Built a full-stack game recommendation platform using **React**, **Node.js**, **FastAPI**, **Redis**, and **MongoDB** to deliver personalized recommendations and real-time trending game data.
- Implemented **filtering, ranking, and search functionality** based on genre, pricing, release date, and popularity metrics to improve recommendation relevance and user experience.
- **Improved application responsiveness** and reduced repeated database queries by implementing **Redis caching** for frequently accessed recommendation data.

SKILLS

Languages: Python, Java, JavaScript, C++, C, C#

Technologies: Node.js, React, MongoDB, Redis, Git, Postman, Azure DevOps, Robot Framework, Selenium, Docker, Linux, HTML/CSS, PyTorch

Concepts: REST APIs, Agile/Scrum, Testing & Debugging, Database Design, Technical Documentation, Object-Oriented Programming
